GRIT SPREADING IN THE CENTRE OF THE VILLAGE

Wiltshire Council Highways have informed us that Common Road has been upgraded to a primary route and is now treated every time a precautionary salt run is called. However, the small section of road in front of the bus shelter is proving difficult with the direction that the gritters travel. To circle the triangle safely would mean the gritter would have to track over the route already treated and shunt the truck around, which is not always easy with a payload of salt on board and when conditions are not great, especially if cars are parked there. They have a two-hour slot where the entire network has to be treated and so any delay is critical as this particular route is on the limit. Highways believe that now Common Road and the A27 area are treated as a primary route, there will be a fair amount of salt naturally tracked by passing car tyres anyway and the drivers have been asked to try and spread salt in that direction of the bus stop as they exit onto the A27.

An alternative solution is for the Parish Council to purchase a grit bin positioned near the bus shelter for residents to use at their discretion on the public highway. We would welcome your views so please come along to the next Parish Council meeting on Tuesday June 25th 7.30pm or inform the Parish Clerk.
